

Predictability from a dynamical meteorology perspective

B Hoskins

Department of Meteorology, University of Reading

Origins of Predictability

- Annual cycle
- Phenomena,
 e.g. cyclone, MJO, ENSO
- Balanced motion:
 PV & Rossby waves
- Slower parts of the climate system,
 e.g. cyclones, long waves, SSTs,
 soil moisture

Topics

1. PV & balanced motion
2. Rossby waves
3. Baroclinic growth, optimal perturbations
4. Blocking & NAO
5. Summer 2002

Balanced motion provides the background for most weather and is uniquely determined by the Potential Vorticity(PV)

PV & θ conserved following adiabatic motion

Rossby Waves

On the sphere and influenced by the ambient jets

Vertical propagation of Rossby waves

Longitude- σ section of most unstable wave number 6
on a jet on the sphere

Methven, Heifitz, Hoskins & Bishop (2002)

Surface pressure and temperature LC1

CI = 4 mb and 5K

John Methven

Downstream Development (Simmons & H, 1979)

Perturbation located at 3km:

Perturbation located at 7km:

PV Section for ECMWF SV1 for 17-19 Feb 1997 (H, Buizza & Badger, 2001)

Energy distribution
for top10 24h SVs
27-28 Dec 99

(Mariane Coutinho)

Dry
(Eady index)

Moist
(column
water)

21 September 1998

250 Z

θ on PV2

Annual mean, local, instantaneous blocking frequency against longitude between June 1996 and May 2001

Red solid curve: Pelly and Hoskins PV/ θ index, variable blocking latitude

Red dashed curve: Pelly and Hoskins PV/ θ index, fixed blocking latitude (50°N)

Blue dashed curve: Tibaldi and Molteni Z500 index, fixed blocking latitude (50°N)

Blue solid curve: Tibaldi and Molteni Z500 index, variable blocking latitude

BLOCKING EVENT DURATION (1 August 2000 to 31 July 2001)

SECTOR BLOCKING IN THE EURO-ATLANTIC SECTOR (1 August 2000 to 31 July 2001)

BLOCK ONSET AND DECAY IN THE EURO-ATLANTIC SECTOR

(1 August 2000 to 31 July 2001)

NAO & Stratospheric Vortex

(Ambsaum & H, 2002)

NAO
Pmsl

PV500K

Lagged correlations
& autocorrelations

Some Events of 2002

- Strong intraseasonal variation in tropics
- Development of El Nino
- Failure of Indian Monsoon
- Floods in Europe

CLIMATE PREDICTION CENTER/NCEP
